The National Traction Engine Trust Ltd, 4 Church Green East, Redditch, Worcs. B98 8BT. Company No. 1302197*

Patrons: James Hervey-Bathurst CBE DL, Lord Faulkner of Worcester, Sir Robert Goodwill MP, Lady Judy McAlpine and The Rt Hon Lord Forsyth of Drumlean

THE NATIONAL TRACTION ENGINE TRUST

Preserving our heritage with steam on the road

Road steam is a recreational hobby maintained and funded by dedicated enthusiasts. It has an important role to play in living history, demonstrating the development of technology and how science & engineering has advanced in the last 200 years.

- 10 million visitors from all walks of life attend over 1200 steam events and museums each year.
- c.6000 road steam engines in the UK contribute just 0.0014% of the overall UK CO₂ emissions.
- An estimated £745M is contributed through local businesses and charities to the economy each year.
- Whilst the overall CO₂ contribution made by the road steam movement is extremely small, the hobby recognises its desire to support initiatives which reduce or address CO₂.

This is being achieved through:-

- **Assisting government legislation around the heritage sector.**
- **Lobbying and supporting efforts to protect the cleanest, most efficient steam coal supplies.**
- **Working with producers of manufactured fuels to seek cleaner and eco options in the future.**
- **Exploring meaningful carbon balancing initiatives.**
